KELOG

WHO ARE WE?

KELOG Logistik GmbH is a reliable partner for all types of logistics processes. We specialise in planning, developing and implementing unique logistics concepts. As a full-service provider, we analyse, optimise and finalise complex projects and use our expertise to assist you with all of your logistics processes.

In July 2013, the efficient logistics department at KESCH Event & Promotion GmbH was turned into an independent company – KELOG Logistik GmbH. Now, five years later, it is an integral part of the SPL Tele Group and is key to the Group's success.

WE WORK FOR YOUR SUCCESS

Integrated thinking and action have top priority at KELOG Logistik GmbH and KELOG Transport GmbH.

Perfectly integrated processes and procedures as well as comprehensive information ensure the success of individual projects and long-term partnerships. In any case, you can expect a lot from us.

MOVINGLY EFFICIENT

- Comprehensive full-service portfolio, whether for contract logistics or intralogistics
- Efficient use of manpower, space, equipment and IT
- Consolidation of existing warehouses and reduction of external warehouses
- Optimised logistics processes and logistics IT
- Special expertise in the logistics industry

WE MAKE YOUR PROCESSES MOVE

As a full-service provider, we use our expertise to assist you with all of your logistics processes. From analysis of the initial situation and an optimised needs assessment to the custom solution.

SERVICES

Our motto is “In the right place at the right time, with the right product and the right content”. This is how customer retention works today.

PROCUREMENT

Our employees are involved in all activities relating to the supply of a company with goods. We process and improve these goods, expanding or rebuilding them if necessary.

DISTRIBUTION

We are the right partner to design, control and monitor your processes. Using our own tools, we are able to analyse your procedures and then optimise them in terms of costs and efficiency.

PRODUCTION

Our warehouses are designed to meet our customers’ special wishes and needs. We have separate areas for production and assembly activities, handling of spares, storage of small components and pallets, outdoor storage and a large order picking area.

REFURBISHMENT

With our intelligent solutions, we optimise your processes for the return of waste and scrap and work with you to find ways of responsible resource management. Our aim is not only to reduce costs in the short term, but also to develop a long-term concept for conserving resources by reconditioning and repairing goods.

SPECIALISTS

Our employees’ solid project management expertise is indispensable to ensure ongoing, attentive, individualised support of all customer requirements. Our team receives additional support from an internal merchandise management and project tool called RiMo. This online tool can be used to view all logistics operations live from anywhere at any time.

SUPPORT CENTER

Professionals who can be contacted around the clock. Our Support Center provides perfectly tailored customer support. This is where everything falls into place. A 24/7 service hotline, a back office with comprehensive administrative support and the expertise gained from many years of logistics experience.

REPLACEMENT PARTS

We strive to supply sufficient quantities of replacement parts throughout all phases of the project so as to avoid downtimes and interruptions and prevent possible additional costs from being incurred in the first place.
